BREEDING GUARANTEES

(a) All cows and heifers which are stated in the catalogue as having been served, or inseminated, not less than twelve weeks before the date of the Sale, or stated as having been running with a bull between dates (the latter of which is not less than twelve weeks before the date of the Sale) will be guaranteed to be in-calf to the service date, the date of insemination, or between dates and to the bull stated in the catalogue, unless alteration is announced at the time of Sale. In the event of any breach of warranty the purchaser must notify the auctioneers in writing, within the time prescribed in the auctioneer's sale rules, which in the case of cows and heifers proving not to be in-calf is 43 days.

All females served, inseminated, or running with the bull less than twelve (12) weeks from the date of Sale shall be described in the Catalogue as not being guaranteed in-calf.

FREEDOM FROM DISEASE

- 1) Vendors must declare their herd's risk level for Johne's disease.
- 2) Herds are classified for Johne's disease as:
 - Risk level 1 – Herds have had at least 3 clear annual herd tests.
 - Risk level 2 – Herds that have had one or two clear annual herd tests.
 - Risk level 3 – Herds that have had less than 3% reactors in their last herd test.
 - Risk level 4 – Herds that have had more than 3% reactors in their last herd test.
 - Risk level 5 – Herds that are either not testing for Johne's disease in an approved health scheme, or are not complying with the rules of such a scheme.
- 3) Members of a licensed cattle health scheme for Johne's disease are required to isolate and test animals purchased from herds at all risk levels other than risk level 1
- 4) A purchaser wishing to take advantage of section 22 of the Society's auction sale rules – purchaser's rights in relation to vendor's warranty for Johne's disease and BVD – should ensure that samples are taken from cattle either prior to leaving the sale ground or within one week of the sale provided they are kept in appropriate isolation during that time.

BULL FERTILITY TESTING

The fertility examination should ideally be done within one month of the sale. Purchasers should note that the veterinary certificate relates to the fertility of the bull on the day of examination. If the interval between the examination and the sale is longer than one month, then the possibility that something could have adversely affected the fertility since the day of the examination is increased.

The veterinary certificate should be made available for inspection at the sale and the purchaser should be supplied with a copy.
